
FOR IMMEDIATE RELEASE

FOR INFORMATION CALL

November 30, 2018

Ald. Michael J. Murphy
(414) 286-3763

Final report released by Heroin, Opioid and Cocaine Task Force

The final report of the **City-County Heroin, Opioid and Cocaine Task Force** was released today and includes an attack plan to end the heroin, opioid and cocaine epidemic that has spread across Milwaukee, Milwaukee County, and the region. The solutions offered include a detailed list of recommendations, ongoing prevention initiatives, and community resources including overdose emergency management guides and trauma response team handouts. **Task Force Co-Chair Alderman Michael J. Murphy** calls to attention the positive changes taking place throughout the city and county and the increase in community and government collaborations to put an end to this tragic epidemic.

The **(attached)** final report – released by the task force today during its final meeting at City Hall – offers a final set of recommendations to address the fatal and non-fatal overdose epidemic in Milwaukee and Milwaukee County involving heroin, opioids, synthetic analogs and cocaine (in both powder and crack form). “Since the Task Force began its work 18 months ago, we have seen some positive developments that are encouraging, but we need to continue to work collaboratively to address this epidemic,” **Alderman Murphy** said. “The Task Force has been concentrating on the long narrative and the recommendations are focused on fighting drug use and addiction – and overdoses – for many years to come.”

Recommendations **focus on aspects related to policy, primary prevention, treatment, community collaboration.** The report consists of various items including but not limited to:

- Advocate for and support provider and social networks focused on long-term recovery including those leaving the prison system.
- Conduct widespread public health education on the risk of substance abuse, targeted to potential users beyond traditional outlets –emphasizing fentanyl, opioid overdose, and other relevant substances.

-More-

Final report/ADD ONE

- Build community capacity to recognize and prevent overdose deaths caused by opioids.
- Support evidence-based harm reduction strategies to reduce overdose related deaths beyond Naloxone (Narcan).
- Ensure substance abuse resources are deployed to high need areas of the community.

Task Force **Co-Chair Mike Lappen**, Administrator, Milwaukee County Behavioral Health Division, said the panel's work was rewarding and for an urgent crisis requiring all hands on deck. "This was a very collaborative effort," he said. "The findings reinforce that we can reduce the terrible toll substance use has on our community by connecting people with high-quality resources early to prevent substance use and to support recovery."

Milwaukee Health Department Commissioner **Dr. Jeanette Kowalik** said the report has the appropriate focus and holds promise for addressing one of the most profound public health crises in recent memory. "I am pleased to support the implementation of the City-County Heroin, Opioid, and Cocaine Task Force Report. These community-driven and focused recommendations are necessary to evoke true change including the need to address the Social Determinants of Health (e.g. housing). We are committed to reframing addiction as a disease—barriers to recovery must be eliminated," Dr. Kowalik said.

Alderman Murphy, the primary sponsor of the Common Council legislation creating the task force, said **multiple community listening sessions** were held across the community during 2018 to gather input before the final report was drafted.

The task force has been hard at work during the past year to shape the policy recommendations and drew members from the Common Council, Health Department, Police Department, Fire Department, Milwaukee County Circuit Court, Intergovernmental Relations, the County Executive's office, healthcare or hospital systems, the Medical Society of Milwaukee County, medical professionals, community organizations and the general public.

Executive Summary

The City-County Heroin, Opioid, and Cocaine Task Force (CCHOCTF) is charged with investigating and making recommendations regarding ways to ensure long-term health and safety of City and County residents by reducing fatal and nonfatal overdose from misuse of opioids, heroin, and synthetic analogs, and cocaine (in both powder and crack form) through data-driven public health prevention approaches. (City of Milwaukee Resolution, Common Council File Number 161061, passed January 18, 2017).

The CCHOCTF represents multiple sectors from city, county, and state agencies and those with lived experiences of substance abuse. The CCHOCTF met regularly to gather information and create items to guide the community in addressing substance abuse. Opportunity for community comments was provided during regular meetings, and two additional meetings were held specifically for community input.

Multiple community engagement sessions occurred throughout Milwaukee County to gain insight from all stakeholders. Participants included those in active treatment or recovery, social workers, public health nurses, family members of those experiencing substance abuse disorder, researchers, community activists, educators, business owners, providers and other concerned citizens. Participants had the opportunity to share their experiences with substance abuse, discuss existing efforts, and expectations of the CCHOCTF by identifying action items. The results of this engagement are incorporated into the CCHOCTF recommendations.

The recommendations included aim to scale up response to death related to substance misuse. The CCHOCTF recommendations include the following focus areas.

1. Enhance and fund existing prevention programs to keep individuals from developing substance use disorder, including youth.
2. Reduce the number of opioid-related deaths in Milwaukee County.
3. Ensure adequate access to timely, affordable, and quality services for all people with substance use disorders.
4. Develop programs in collaboration with the criminal justice system that treat addiction as a disease, while actively working to reduce the availability of illicit substances.
5. Enhance collaboration between community-based initiatives and government agencies.
6. Improve epidemiology and surveillance related to substance misuse.
7. Support federal, state, and local policies and legislation aimed at reducing substance misuse and overdose with equitable, cost-effective, and evidence based approaches.

This document serves as a guide to develop multifaceted strategies across communities to address substance abuse. The recommendations represent a shared-vision of how stakeholders across Milwaukee should join forces to combat this public health crisis. It also highlights existing efforts throughout Milwaukee that align with the CCHOCTF recommendations.

Letter from Co-Chairs

Dear Community Members,

On behalf of the City-County Heroin, Opioid, and Cocaine Task Force we present to you the final recommendations generated by the Task Force to turn the tide against a wave of overdoses and substance abuse in our community.

The City and County of Milwaukee is a storied community with the potential for a bright future. Its foundation is built upon a spirit of resiliency, vibrant culture, and a strong sense of community. We are also a community that faces massive challenges, particularly a public health crisis driven by substance abuse.

This is one of the most significant public health crises we have faced, and its scope and magnitude are substantial. Over the past 5 years, drug overdoses are the leading cause of non-natural death in Milwaukee County, killing over 1,700 individuals. This epidemic crosses racial, economic, and cultural boundaries, affecting every facet of our lives. It is inseparable from problems of poverty, violence, incarceration, homelessness, and mental health. As a result of the wide-ranging contributing factors to this substance abuse epidemic, any solution will require a multi-disciplined approach.

The devastating reach and impact on our community served as the catalyst in creating this Task Force. Over the past two years, a substantially qualified set of officials, health professionals, community leaders, academics, and industry experts have dedicated themselves to generating recommendations with four guiding principles.

1. This is a public health issue, and therefore solutions must be framed through a public health lens.
2. Substance abuse is a community-wide problem, which necessitates a comprehensive, coordinated approach with collaboration across the various levels and agencies of government.
3. Recommendations and strategies for implementation must be evidence-based, actionable, create accountability, and represent community input.
4. Community engagement is critical to this effort, to increase public awareness, identify missing elements, and generate momentum.

Going forward, the Task Force will utilize these recommendations to guide the development and enhancement of efforts. Additional community collaboration will be required to put these recommendations into action.

Most importantly, we want to stress that there is hope. Addiction and this crisis can be overcome. While the yoke of addiction is heavy and the challenges we face are substantial, we can begin to alleviate the burdens created by substance abuse by harnessing Milwaukee's collective power and resiliency, engaging with compassion and urgency.

Michael J. Murphy
Alderman, 10th District

Mike Lappen
Administrator, Milwaukee County Behavioral
Health Division
Co-Chair

Overview

Focus	Recommendation
<i>Enhance and fund existing prevention programs to keep individuals from developing substance use disorder, including youth.</i>	<ul style="list-style-type: none"> • Conduct widespread public health education on the risk of substance abuse, targeted to potential users beyond traditional outlets—emphasizing fentanyl, opioid overdose and other relevant substances. • Support healing programs and services for families and children impacted by the impact of substance abuse. • Collaborate with local medical associations to increase provider knowledge, education and use of the Enhance Prescription Drug Monitoring Program (ePDMP).
<i>Reduce the number of opioid-related deaths in Milwaukee County.</i>	<ul style="list-style-type: none"> • Advocate for and support provider and social networks focused on long-term recovery including those leaving the prison system. • Support evidence-based harm reduction strategies to decrease overdose related deaths beyond Naloxone. • Build community capacity to recognize and prevent overdose deaths caused by opioids. • Ensure substance abuse resources are deployed to high need areas of the community. • Support the development of policies that incentivize property owners to rent to those in recovery.
<i>Ensure adequate access to timely, affordable, and quality services for all people with substance use disorders.</i>	<ul style="list-style-type: none"> • Advocate for small residential treatment facility to address the needs of those receiving Medicaid. • Ensure access to alternative pain management therapies. • Integrate comprehensive MAT into the various settings, including but not limited to: Federally Qualified Health Centers, Opioid Treatment Programs, Prisons and other primary care settings.

<p><i>Develop programs in collaboration with the criminal justice system that treat addiction as a disease, while actively working to reduce the availability of illicit substances.</i></p>	<ul style="list-style-type: none"> • Implement restorative justice practices for those criminalized due to substance use disorder. <p>* Integrate comprehensive MAT into the various settings, including but not limited to: Federally Qualified Health Centers, Opioid Treatment Programs, Prisons and other primary care settings.</p> <p>* Advocate for and support provider and social networks focused on long-term recovery including those leaving the prison system.</p>
<p><i>Enhance collaboration between community-based initiatives and government agencies.</i></p>	<ul style="list-style-type: none"> • Support a multidiscipline community led initiative to identify strategies for the CCHOCTF recommendations and oversee implementation and monitoring of community efforts.

<p><i>Support federal, state, and local policies and legislation aimed at reducing substance misuse and overdose with equitable, cost-effective, and evidence-based approaches.</i></p>	<ul style="list-style-type: none"> • Develop and enforce substance abuse parity with health insurers to address the disparities amongst access to substance abuse treatment. <p>* Implement restorative justice practices for those criminalized due to substance use disorder.</p> <p>* Advocate for small residential treatment facility to address the needs of those receiving Medicaid.</p>

* Indicates a duplication due to overlapping areas of focus.

Recommendations

Advocate for and support provider and social networks focused on long-term recovery including those leaving the prison system.

Treatment is an essential stage of recovery; however, maintaining sobriety is just as critical. The CCHOCTF recommends recovery programs supporting long-term recovery including, housing supports, employment, food and nutrition, financial management, legal assistance, and peer support. Many incarcerated have never received treatment for substance use disorder. Those who undergo detox during their time in prison are more likely to overdose after leaving prison. The CCHOCTF recommends the development of aftercare relapse prevention for those leaving prison systems. ***This also includes establishing partnerships amongst public and private entities.***

Conduct widespread public health education on the risk of substance abuse, targeted to potential users beyond traditional outlets—emphasizing fentanyl, opioid overdose and other relevant substances.

Similar to current the Department of Justice ‘Dose of Reality’ campaign aimed to prevent prescription opioid abuse in Wisconsin, the CCHOCTF recommends launching a public health education initiative focused on including Cocaine and Fentanyl and other substances of abuse.

The opportunity to prevent substance abuse amongst youth should occur throughout middle and high school. The Milwaukee County community needs more preventative efforts focused on educating youth on the risk of substance abuse and overdose prevention. The CCHOCTF recommends expanding primary prevention initiative to focus on addiction and overdose education to target 6th-12th graders.

Build community capacity to recognize and prevent overdose deaths caused by opioids.

Individuals with substance use disorder or experience substance misuse are at-risk of overdosing in various settings. The CCHOCTF recommends increasing Naloxone access and training to community stakeholders with standardize community training that emphasizes calling 911. Many City and County staff service the community directly in various capacities across multiple sectors. All local governmental direct service staff should be trained to recognize and respond to an overdose with Naloxone.

Support evidence-based harm reduction strategies to decrease overdose related deaths beyond Naloxone.

The CCHOCTF recommends developing and supporting distribution of rapid testing kits for drug users to test substances for Fentanyl, safe needle exchange, harm reduction messaging such as ‘Don’t Use Alone’ and others.

Ensure substance abuse resources are deployed to high need areas of the community.

A system for detecting geographically concentrated spikes in overdoses can help provide information to ensure harm reduction initiatives are effective and efficient. With this information, resources should be deployed to specific areas of the city. Notification to partners who can respond rapidly should be sent immediately upon a spike detection. These information increases community awareness and assist with appropriate distribution of Naloxone.

Support healing programs and services for families and children impacted by the impact of substance abuse.

To address community and familial trauma caused by substance use disorders, support for services should aim to eliminate generational cycles of substance abuse by supporting and advocating for healing program and services.

Support the development of policies that incentivize property owners to rent to those in recovery.

After receiving treatment, those in recovery need to return to healthy environments. However, access to housing is limited for this population. The CCHOCTF recommends advocating to create incentives for property owners when renting to those in recovery.

Collaborate with local medical associations to increase provider knowledge, education and use of the Enhance Prescription Drug Monitoring Program (ePDMP).

There has been an increase in the number of providers using the states ePDMP. The number of opioids prescribed in recent years has declined (AMA, 2018). Collaborating with local medical institutions on similar programs will also aid in providing vital information to law enforcement, researchers and pharmacies.

Ensure access to alternative pain management therapies.

Alternative approaches to opioid medications help manage chronic pain with those co-occurring substance abuse and mental illness¹. The CCHOCTF recommends approaches of treatment that reach beyond the physical source of pain but include the emotional and mental effects. This effort also aligns with the [National Pain Strategy](#).

Develop and enforce substance abuse parity with health insurers to address disparities amongst access to substance abuse treatment.

There is a growing need for evidence-based treatment proven to reduce illicit opioid use and overdose risk. The lack of providers that offer these services is due to limited reimbursement and access caused by health insurers². The CCHOCTF recommends the development and enforcement of health parity focused on substance abuse.

Advocate for small residential treatment facility to address the needs of those receiving Medicaid.

The Institute for Mental Disease (IMD) Exclusion applies to residential substance use treatment providers. These providers, either in a single location or in the aggregate, have more than 15 beds. The IMD Exclusion was intended to keep States from warehousing people with mental illness in State operated asylums, it was never intended to prevent Medicaid participants from accessing substance use disorder treatment.

Currently Milwaukee's local residential providers fall under the exclusion and thus Medicaid is not an available funding source for residential AODA treatment. This means the County can only fund with grants—that come with treatment priorities and other challenges and limitations. Therefore, the CCHOCTF recommendation advocacy for small residential treatment facility to address the needs of those receiving Medicaid.

² Mark, T. L., Olesiuk, W., Ali, M. M., Sherman, L. J., Mutter, R., & Teich, J. L. (2017). Differential reimbursement of psychiatric services by psychiatrists and other medical providers. *Psychiatric Services*, 69(3), 281-285. DOI: 10.1176/appi.ps.201700271

Integrate comprehensive MAT into the various settings, including, but not limited to Federally Qualified Health Centers, Opioid Treatment Programs, Prisons and other primary care settings.

The CCHOCTF should increase access to “office-based” MAT services. This approach allows physicians more accessibility to certifications. Furthermore, the strategy aligns with [ForwardHealth June Update](#). Those incarcerated experiencing substance use disorder, need treatment that is consistent with other medically oriented healthcare avenues. The CCHOCTF recommends advocacy for prisoners to receive treatment for substance abuse including MAT. Medication alone is not a sustainable approach to ensuring one’s health. MAT should be comprehensive which supportive services to ensure long-term recovery.

Implement restorative justice practices for those criminalized due to substance use disorder.

The 2017 Wisconsin Act 32 offers alternatives to prosecution and incarceration—including drug courts for individuals charged with certain drug-related crimes. However, this bill does not account for the thousands of individuals imprisoned for similar crimes included in the legislation. The CCHOCTF recommends advocating for expanding Treatment and Diversion (TAD) grants to include those who are currently incarcerated due to substance misuse by amending prison time for treatment.

Support a multidiscipline community led initiative to identify strategies for the CCHOCTF recommendations and oversee implementation and monitoring of community efforts.

To ensure recommendations are advanced into action, the CCHOCTF recommends the development of a community led initiative to identify aligning strategies. Addressing substance abuse at a community level requires a wide-spectrum of stakeholders. The CCHOCTF represent various sectors of governmental agencies, however, future efforts should include a variety of other stakeholders such as family and children advocates. The initiative should consist of community partners as strategy implementers and include a monitoring and reporting process.

City-County Heroin, Opioid, and Cocaine Task Force

The Task Force and community deserve a sincere thank you for the professional manner in which they embarked on this massive undertaking in a collaborative spirit. The Task Force has passionately and judiciously worked countless hours with the community in creating these recommendations.

Appendix A: Community Resources

Milwaukee Community Opioid Prevention Effort (COPE): Opioid Overdose Prevention Activities Data and Research

What we have done

- Performed a systematic review of the literature to identify effective, evidence-based interventions that reduce opioid-related overdose deaths in the community.
- Developed a lay-community report on the benefits and barriers of various community-based prevention efforts.
- Worked with the Milwaukee County EMS medical director to review the current EMS suspected overdose treatment protocol to ensure it addressed the sharp increase in fentanyl-related overdose deaths that are occurring in our community.
- Provided a formal report to support recommended changes to the maximum Naloxone dose in the treatment protocol.
- Developed a pathway to explain who and how people die of an overdose to facilitate discussions with external groups as well as to assist in internal planning.

Ongoing initiatives

- Gather and analyze data from the various sources in the Milwaukee community to better understand this issue.
- Produce a report bi-annually on opioid-related data in Milwaukee County and disseminate widely.
- Fostering collaboration between academic and community partners to identify gaps and develop research proposals to address those gaps.

Community-Driven Projects

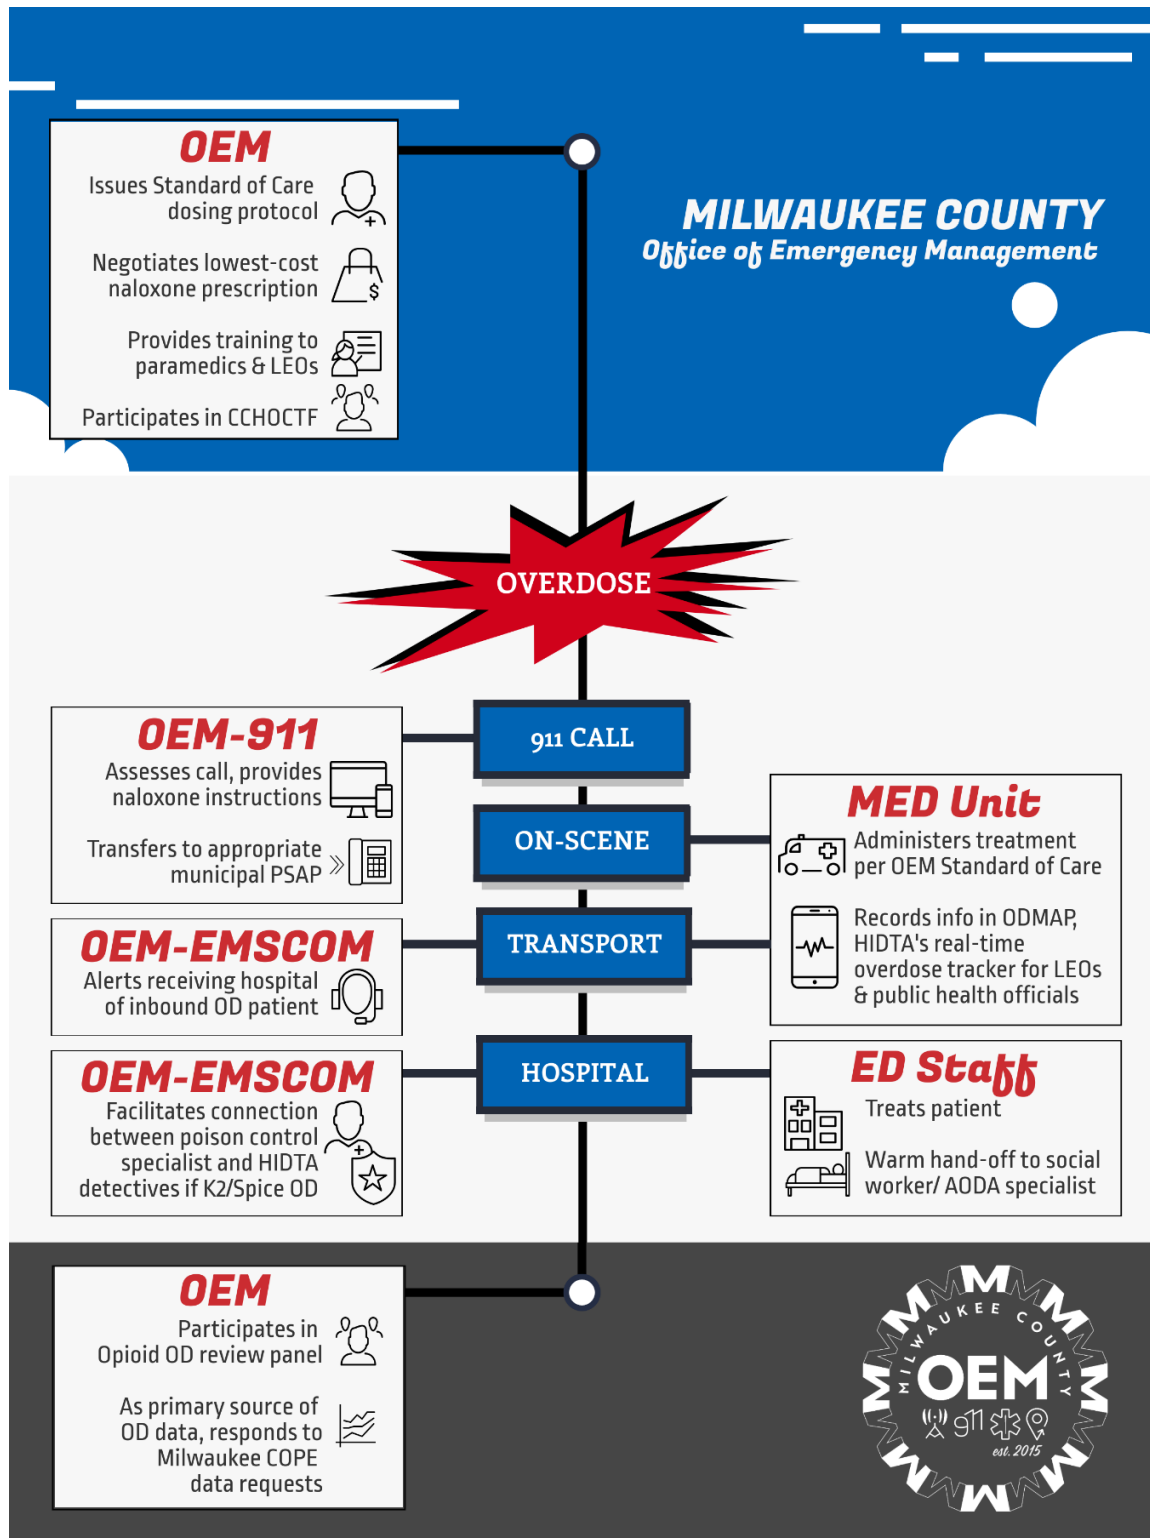

- Through collaboration with numerous individuals and organizations who are working in this field, we have identified prevention strategies and worked to implement them.
- Developed and disseminated a tool to create an inventory of community-level efforts to reduce opioid and heroin overdose deaths in Milwaukee.
- Performed needs assessment with local organizations to identify specific needs at the organizational level as well as at the county level.
- Developed a palm card and website with information about seeking help and harm reduction for families, friends, and users.

Communications and Media

- Maintain a Facebook page to share both local and national information about the opioid epidemic as well as other relevant materials with the community.
- Maintain a project website to share data reports and disseminate project documents.
- We have given over 30 educational presentations about the opioid epidemic in Milwaukee, including:
 1. Lectures to undergraduate, graduate, and medical students at the Medical College of Wisconsin and the University of Wisconsin,
 2. Presentations to professional groups such as the MCW Symposium for Senior Physicians and the Milwaukee Regional Research Forum
 3. Policy presentations such as to the City-County Opioid, Heroin and Cocaine Task Force, and
 4. Media interviews.

Milwaukee County Office of Emergency Management

Appendix C: Community Resources

Milwaukee County Behavioral Health Division

Comprehensive Opiate Plan

WHAT WE ARE CURRENTLY DOING

Prevention

- Evidence Based Practice Prevention
- Prescription Drug Boxes in local police stations
- Support annual DEA drug take-back days

Early Intervention

- Resource card for life after overdose
- Narcan nasal spray distribution for opioid overdoses to residential programs

Recovery Services & Programs

- Includes: anger management, bridge housing, child care, parenting assistance, peer specialist services, school and training, spiritual support, supported employment

Treatment

- Variety of federal, state, and grant funding sources to pay for clinical treatment for opioid dependence
- Milwaukee County residents can request a comprehensive screen for substance abuse services
- Treatment is funded by Milwaukee County, the consumer's Medicaid benefits, or a combination of the two

TREATMENT SPECTRUM

Opioid Treatment Programs (OTPs) cut across all levels of treatment: it is a combination of medication, counseling, and behavioral therapy.

AODA Residential (764 consumers served) \$4,970,539 per year Services: clinically supervised therapeutic environment, 3 - 11 hours per individual per week
Day Treatment (57 consumers served) \$33,245 per year Services: medically monitored individual or group counseling and case management with physician supervision, a minimum of 12 hours of counseling per week
Outpatient Services (784 consumers served) \$464,991 per year Services: Individual, group, and/or family sessions, ameliorate negative symptoms and restore effective functioning

Milwaukee County Substance Abuse Prevention Coalition

MILWAUKEE COUNTY SUBSTANCE
ABUSE PREVENTION COALITION

OUR MISSION

To improve the quality of lives in our community by preventing the harmful consequences of substance use and abuse among youth, families, and the larger community.

WHY WE EXIST:

Established in 2011, the Milwaukee County Substance Abuse Prevention (MCSAP) Coalition is a countywide initiative with a vision of bringing together resources, wisdom, talents and passion to create a happy and healthy community. MCSAP addresses policies, practices and programs in our two priority areas: marijuana use amongst youth, and death by drug overdose.

OUR PARTNERS:

MCSAP includes representatives from:

- » Youth Organizations
- » Faith-based Organizations
- » Government
- » Media
- » Schools
- » Legal/Justic Systems
- » Civic Organizations
- » Health Services
- » Businesses
- » Nonprofit
- » Alcohol & Other Drug Prevention Organizations and Community Members

DID YOU KNOW?

- ▶ According to the YRBS, the percentage of high school students who used marijuana at least once in the last 30 days in Milwaukee County was **47% higher than the rest of the state of Wisconsin** and **37% higher than the rest of the nation**.¹
- ▶ Enough prescription painkillers were prescribed in 2010 to medicate every American adult around-the-clock for a month.²
- ▶ Marijuana users are **twice** as likely to be in a **motor vehicle accident**. They also have **lower levels of educational and employment achievement** and **lower life satisfaction**.^{3,4}
- ▶ The prevalence of drug-related deaths in Milwaukee County continues to be nearly twice that of the rest of the state of Wisconsin.⁵
- ▶ Estimates of the total **overall costs of substance abuse** in the United States, including productivity and health-and crime-related costs, **exceed \$600 billion annually**.⁶

Appendix E: Community Resources

United Community Center

The brochure is titled "HUMAN SERVICES" at the bottom in large, bold, blue letters. It features a colorful, abstract background with splashes of red, yellow, and blue. Three decorative masks are placed around the text: a multi-colored mask at the top left, a red and white mask at the top center, and a multi-colored mask at the bottom right. The brochure is divided into three main columns. The left column is titled "SUBSTANCE ABUSE TREATMENT" and "TREATMENT LEVELS". The middle column is titled "PROGRAMS" and lists three specific programs: "MADRES SANAS, NIÑOS SANOS (MSNS)", "VIDA SALUD Y ESPERANZA (VSE)", and "FAMILIAS SANAS (FS)". The right column is titled "CENTRAL INTAKE UNIT" and "CONTACT INFORMATION". It includes contact details, a photo of the building, and a table of "HOURS OF SERVICE".

SUBSTANCE ABUSE TREATMENT

UCC provides culturally competent, language specific, gender responsive/specific, trauma informed, and co-occurring treatment for both men and woman. We serve people of all races/ethnicities, but specialize in addressing the needs of Milwaukee's underserved Hispanic population. UCC is the only bilingual/bicultural treatment program in Wisconsin with a complete continuum of care (Outpatient, Day Treatment and Residential).

TREATMENT LEVELS

- **Outpatient**
Non-residential service totaling less than 12 hours of treatment per week.
- **Day Treatment**
Non-residential service totaling a minimum of 12 hours of treatment per week.
- **Residential** *Voluntary admissions only
24 hour residential treatment facility.

All treatment levels feature individual, group and family counseling, mental health services for dually diagnosed clients with evaluation, treatment and an array of other services.

PROGRAMS

MADRES SANAS, NIÑOS SANOS (MSNS)

Residential treatment services for pregnant women or have minor children. Program will serve mothers, their infants and their minor children. Services extended, when appropriate, to fathers of the children and other family members of the women. Program is in partnership with Sixteenth Street Community Health Center (SSCHC).

VIDA SALUD Y ESPERANZA (VSE)

Integrated substance abuse, mental health and medical care for men and women with substance abuse and/or mental health disorders who are also at risk for or living with HIV. Program is in partnership with SSCHC.

FAMILIAS SANAS (FS)

Collaborative engagement project with SSCHC to increase participation in integrated treatment services (Medical, Mental Health and Substance Abuse Disorder).

CENTRAL INTAKE UNIT

Screening and authorization for Substance Abuse services. UCC Human Services is a bilingual intake unit from the county and can take clients by appointment or walk in.

City of Milwaukee & Milwaukee County: Trauma Response Team

What is the Trauma Response Team?

The Trauma Response Team (TRT) is a partnership between the City of Milwaukee Office of Violence Prevention, Milwaukee County Children's Mobile Crisis, the Milwaukee Police Department, the Milwaukee Fire Department, and community organizations to respond to children who've been exposed to trauma or stressful experience either directly or in their neighborhoods.

There is no cost or insurance needed to use this service.

If your child has been exposed to a potentially traumatic event, we would like to meet with you to provide your family with support.

A member of the TRT will contact you to set up a time to meet that works with your schedule.

We can help you understand your children's reaction to the stressful experience and share ideas that can help identify and manage their behaviors after the experience.

For more information or to speak with a team member please call the

Experiences:

When children have been exposed to stressful situations they often react in ways that impact their daily life, which can last long after the event has happened.

Some types of experiences that may be traumatic include:

- Community Violence
- Domestic Violence
- Exposure to Gun Violence
- Abuse or Neglect
- Loss of a Loved One
- Bullying/Cyberbullying
- Serious Illness or Injury
- Victim or Witness of a Crime

COMMUNITY ACCESS TO RECOVERY SERVICES (CARS)

Available through the Milwaukee County Behavioral Health Division

If you or your loved one is living with a mental health, substance abuse or co-occurring (mental health and substance abuse) disorder, find peace of mind knowing recovery is possible.

Community Access to Recovery Services (CARS) specializes in helping Milwaukee County residents like you or your loved one get connected with the resources needed to guide and support you on the journey to recovery. CARS has five main areas of focus that put you or your loved one at the center of care, while following best practices to achieve the most positive outcomes. The areas include:

- Prevention
- Access
- Treatment
- Care management
- Recovery support services

CARS's strong partnerships with trusted, local providers give you or your loved one access to treatment and recovery services that are close to home. Recovery services provide the support and education to learn how to use proven tools to take charge of your health and wellness.

The first step on the journey to recovery

Get started by contacting CARS for an assessment to learn which services are the best fit. There are many ways to begin the assessment process:

- Ask the behavioral health professional caring for you or your loved one to download and complete a referral form at county.milwaukee.gov/BHD-CARS.
- Fax completed forms to 414-454-4242.
- Call CARS directly at 414-257-8095.
- Visit or call one of CARS's community-based access point locations.

An assessment typically takes 1-1/2 to 2 hours. This in-depth screening may include questions about mental health history, drug and alcohol use, and other areas of life for you or your loved one. With this information, the CARS team and access point staff can connect you or your loved one to the appropriate programs, level of care, and services that meet your interests and needs.

PREVENTION

In many cases, a personal or family crisis occurs without warning. But that doesn't mean the only time to think about a crisis is in the moment it is happening. There are things that you, your loved ones and even the general public can do to help prevent a crisis.

Being more aware of, informed about and educated on mental health, substance abuse and co-occurring disorders is important for crisis prevention. That's why CARS is taking steps now to help Milwaukee County residents like you become more knowledgeable about these life challenges.

As more people have a better understanding of mental health, substance abuse and co-occurring disorders, we can reduce the stigma, shame and embarrassment often felt by those in need. This, in turn, will encourage more individuals to reach out for help before a crisis occurs.

CARS also focuses on building bridges and opportunities in communities throughout Milwaukee County, working side by side with other organizations to help improve wellness and decrease the stigma of mental health, substance abuse and co-occurring disorders.
